

The image features a large, detailed electron micrograph of a coronavirus particle, showing its characteristic spherical shape and the dense layer of surface spikes. The particle is rendered in grayscale against a dark background. A semi-transparent green circular overlay is positioned on the right side of the image, partially covering the virus particle and extending to the right edge. The text 'Coronavirus (COVID-19) Pandemic' is overlaid on the left side of the image in a white, bold, sans-serif font.

Coronavirus (COVID-19) Pandemic

**Please use the
Government website
in your country as a
source of information to
stop the spread of
Coronavirus (COVID-19)**

A composite image featuring a large, detailed electron micrograph of a coronavirus particle on the left, showing its characteristic surface spikes. The right side of the image is a semi-transparent green overlay with a lighter, more abstract representation of the virus's surface. A white curved line separates the two sections.

**Collectively we can
defeat this deadly
disease**

A composite image featuring a large, detailed electron micrograph of a coronavirus particle on the left, characterized by its spherical shape and prominent surface spikes. The right side of the image is a semi-transparent green overlay showing a similar but less detailed view of the virus. A white curved line separates the two sections.

**With your help we can
educate others**

A composite image featuring a large, detailed grayscale electron micrograph of a coronavirus particle on the left, showing its characteristic surface spikes. On the right, a semi-transparent green circular area contains a lighter, more abstract representation of a virus particle. The background is dark with faint, out-of-focus virus particles.

Help to stop the spread
of COVID-19

The image features a split background. The left side is dark with a grayscale electron micrograph of a spherical virus particle covered in surface proteins. The right side is a bright green color with a semi-transparent overlay of the same virus particle image. A white curved line separates the two halves.
